# projected solutions

*Lifted* questions too, we can give an answer for each type of request in the vertical business or personal freight. From the project to the installation, all is made in the maximum respect of safety rules and with the help of technical qualified staff who realize solutions to satisfy your needs. *Atmec, there is. We feel lifted!*

*In still:  
External system  
c/o "Divella spa"  
Rutigliano (Bari)*

*pantograph  
platforms*

● *industrial*  
**l i f t i n g**

*Pantograph* platforms are built in conformity with the principle of equal strength and the steely articulated joints of high quality, are perfect for the lifting of big and petty loads. Systems are realized as agreed with safety and CE rules. We can realize a series of standard products, as well as platforms for each type of pretension.

*To increase production, to promote industrial flows, to make easy shifts. A typical pretension of industrial and commercial world.*
